

## IIR LMI Research

### Hearts & Minds Investments Limited (ASX: HM1)

During the month we completed a review of Hearts & Minds Investments Limited (ASX: HM1). HM1 is designed to provide exposure to the highest conviction ideas of a select group of fund managers. The Company was established on the back of the Sohn Hearts and Minds Investment Leaders Conference, an annual conference in which participating fund managers provide their highest conviction investment idea for the year. Funds raised from the Conference are donated to medical research organisations.

In the initial years of the Conference, the investment ideas performed extremely well and HM1 was created to provide a vehicle for investors to gain exposure to these investment ideas while providing a vehicle to raise additional funds for medical research.

The investment strategy of HM1 is unique with the portfolio constructed from recommendations from two groups of fund managers: (1) Conference Fund Managers (35%) – fund managers that present at the annual Sohn Hearts and Minds Investment Leaders Conference; and (2) Core Fund Managers (65%) select group of fund managers that provide their three highest conviction ideas. HM1, while an investment vehicle is also a philanthropic vehicle with all participants, except for the management team, donating their time to the Company. The donation of time from the Board members, the Investment Committee and fund managers means there are no management fees paid by the Company. An amount equivalent to 1.5% p.a. of the average monthly post-tax NTA is contributed to the designated medical research organisations on a semi-annual basis.

After a strong start in the initial years, market volatility and a lack of portfolio construction oversight delivered weak relative performance with a number of the stocks in the portfolio falling significantly shortly after the Conference in November 2021. This has resulted in a number of changes with regards to portfolio construction processes and more active oversight of the portfolio and the Conference Portfolio stocks.

IIR has assigned HM1 a Recommended rating (previously Recommended Plus). The change in the rating largely reflects the performance of HM1 which has suffered as a result of timing of investments and the structure of the portfolio. The Company has sought to increase portfolio oversight and engagement with fund managers as well as provide a greater level of diversification of fund manager styles to improve the diversification in the portfolio. This is designed to have a positive impact on the volatility of the portfolio as well as reduce drawdowns in future. HM1 provides a unique investment proposition, however the high conviction nature of the portfolio means the Company is heavily reliant on the performance of the stock pickers and engagement of the fund managers. The sizable discount has been a drawback for investors however we continue to believe the elevated discount provides an attractive entry point for those investors seeking exposure to the Company with a narrowing of the discount providing the potential for enhanced returns. This will likely be driven by the portfolio delivering improved risk-adjusted returns.

### Global Masters Fund Limited (ASX: GFL)

GFL is a listed investment company (LIC) that seeks to achieve medium-to-long term capital growth through investing in a portfolio of global investments. The Company listed in 2006 with the goal of pooling capital to invest primarily in Berkshire Hathaway Inc. ("Berkshire"), a multinational holding company and conglomerate listed on the New York Stock Exchange. Over time the Company has pursued other investments without diluting the Berkshire exposure by utilising capital raising events, such as the rights issue in 2017 and the convertible notes offer in 2021.

The additional investments have sought to provide an actively managed element to the portfolio to complement the passive investment in Berkshire. The capital raised from the Convertible Notes issue in 2021 has been invested in the ECP Global Growth Fund, a relatively new unlisted fund managed by EC Pohl & Co Pty Ltd. The ECP Global Growth Fund seeks to invest in a portfolio of global equities with a focus on quality growth

stocks. The Fund employs the same investment process and philosophy the Manager employs for its funds with a domestic equity focus to the global market. GFL has a management services agreement with EC Pohl & Co Pty Ltd for the provision of investment management services and administrative services. There are no fixed management fees and no performance fees payable to the Manager for the administration of the Company. The Company has historically invested in cash and/or cash equivalents and dividend paying securities to cover the costs of operating and administering the Company. There is however fees payable for the actively managed components of the portfolio, including fees incurred through the investment in managed funds (listed and unlisted) and fees incurred for the management of the investment in the portfolio of UK securities.

IIR has maintained the Recommended Plus rating for GFL. The Company provides domestic investors access to Berkshire, something which can be difficult for retail investors to access given the significant price at which Berkshire shares trade. GFL has a favourable fee structure with fees only being charged on the actively managed investments in the portfolio. The addition of the ECP Global Growth Fund provides exposure to an actively managed portfolio of global securities, providing an element of diversification to the GFL portfolio with little portfolio overlap between Berkshire and the fund. GFL is effectively providing the seed capital to the ECP Global Growth Fund. In turn for this, GFL has invested in fee free units in the fund, meaning investors will benefit from the full performance of the fund minus expenses. We note further investments in the fund will likely be in fee paying units. GFL provides a differentiated exposure to global markets and has performed well, with investors benefiting from the long-term performance of Berkshire. A key drawback of the Company is the lack of liquidity with just 10.7 million shares on issue and the Investment Manager owning 47.5% of shares on issue, resulting in a low level of free float for investors. We note that GFL has delivered positive share price growth over the long-term and the stability of the discount over certain periods has resulted in the portfolio and the share price moving largely in step at times. However, the discount remains an issue that needs to be addressed for the long-term benefit of investors.

## LMI Market News

### PCI Raise \$66.2m and Announces UPP

On 9 July 2024, Perpetual Credit Income Trust (ASX: PCI) announced it was looking to raise capital through a Placement to wholesale investors and a Unit Purchase Plan (UPP) to eligible unitholders.

The Placement was completed shortly after the capital raising was announced with 60.2 million new units issued at \$1.10 per unit, raising \$66.2 million.

The UPP was scheduled to close on 6 August 2024. Eligible investors were able to apply for up to \$30,000 worth of PCI units. New units will be issued at \$1.10 per unit. The maximum number of units that can be issued under the UPP is 120.4 million, which equals 30% of the units on issue at the date of the announcement. If the UPP was fully subscribed this would equate to \$132.4 million.

The capital raised will increase the size of the Trust with investors potentially benefiting from increased liquidity and greater diversification in the unitholder base. The Manager has identified numerous opportunities where additional capital can be deployed, including an attractive pipeline of corporate loan and securitised asset deals, which are expected to complement the relative value opportunities identified in investment grade and high yield credit and fixed income assets. The Trust will seek to deploy the capital raised as quickly as possible to reduce the impact of cash drag on the portfolio.

PCI has taken advantage of the Trust trading at a slight premium to NAV coupled with the NAV being around the offer price at the IPO. This means the capital raising is not dilutive for those investors that have been investors since the IPO.

#### **PAI and PMC Propose Conversion to Active ETFs**

During the month, Platinum Capital Limited (ASX: PMC) and Platinum Asia Investments Limited (ASX: PAI) completed their strategic reviews and will be pursuing a scheme of arrangement with the relevant Active ETFs. PMC will propose a scheme of arrangement with the Platinum International Quoted Fund (Quoted Managed Hedge Fund) (ASX: PIXX) and PAI will pursue a scheme of arrangement with Platinum Asia Fund (Quoted Managed Hedge Fund) (ASX: PAXX).

If the scheme of arrangements are implemented, shareholders will receive PIXX and PAXX units in exchange for their PMC or PAI shares, respectively. Conversion to units in the Active ETFs will allow PMC and PAI shareholders to continue to gain exposure to the respective strategies while removing the impediment of the discount at which the companies have traded. There will be some changes with regards to the dividends. PIXX and PAXX pay an annual distribution and distributions are not franked. This compares to the semi-annual dividends paid by PMC and PAI, which the Company seeks to fully frank.

The scheme of arrangements are subject to a binding scheme implementation deed between the respective companies and Platinum, the Responsible Entity for PIXX and PAXX, as well as shareholder and court approval. The companies will provide a further update by the end of September.

#### **PGF Announces Placement & SPP**

On 30 July 2024, PM Capital Global Opportunities Fund Limited (ASX: PGF) announced a non-underwritten Placement to sophisticated and wholesale investors to raise up to \$100 million and a Share Purchase Plan (SPP) to raise up to \$20 million. Shares under both the Placement and the SPP will be issued at \$2.19 per share, which represented the estimated NTA per share at the time of the announcement and a 6.4% discount to the share price prior to the announcement.

The Company raised \$135 million from the Placement, in excess of the original placement size of \$100 million. \$135 million was the maximum placement capacity for PGF. 61.45 million new shares were issued under the Placement.

The SPP will provide eligible shareholders the opportunity to acquire up to \$30,000 worth of PGF shares. The SPP is scheduled to open on 9 August 2024 and close on 28 August 2024.

The Company has announced the intention to pay a final dividend of 5.5 cents per share, fully franked, for the FY24 period. The Company also provided forward dividend guidance for FY25 of a minimum semi-annual dividend of 5.5 cents per share, fully franked, for a total FY25 dividend of 11 cents per share. New shares issued under the Placement and SPP will be entitled to receive the final dividend for FY24.

#### **BTI Invests in DASH Technology Group**

During the month, Bailador Technology Investments Limited (ASX: BTI) announced it had invested in DASH Technology Group, a cloud based financial advice and investment management software platform used by independent financial advisers (IFAs) and financial institutions.

The investment involves an upfront investment of \$15 million and an additional \$5 million investment in January 2025. Both David Kirk and James Johnstone will join the DASH Board as part of BTI's investment.

BTI made four investments in FY24, two follow-on investments in Access Telehealth and RCTop Co and two new investments in Updoc and DASH with the portfolio currently comprising 9 investments. After the recent investments in Updoc and DASH, the Company had \$62 million cash.

BTI's pre-tax NTA delivered a 12.3% return for the FY24 period. Returns were driven by the listed investments, with SiteMinder (ASX: SDR) increasing \$36 million in value for BTI, an increase of 74%. SiteMinder is the largest position in the portfolio, growing to \$85.1 million with a gain of 511% on the capital invested.

The Company will pay a final dividend equivalent to 2% of the June pre-tax NTA, in line with the dividend policy. Based on the pre-tax NTA as at 30 June, the final dividend would equate to 3.44 cents per share. This combined with the interim dividend of 3.5 cents per share, the full year dividend is expected to be around 6.9 cents per share, representing a yield of 5.9% based on the share price as at 30 June 2024. We note that the NTA remains subject to audit. These figures are estimates only.

#### **PL8 to Maintain Dividend for September Quarter**

Plato Income Maximiser Limited (ASX: PL8) announced it will maintain the monthly dividend of 0.55 cents per share for the September quarter. The Managing Director of the Manager, Dr. Don Hamson stated that "the Australian economy is slowing, but we expect to receive solid dividends from a diversified portfolio of Australian companies in 2024."

As at 30 June 2024, the Company's franking account was \$13.3 million, equivalent to 1.8 cents per share and represents a fully franked dividend of 4.1 cents per share.

The Company continued to deliver on its objectives and delivers an attractive grossed-up yield despite trading at a premium to NTA. The fact that PL8 is the main point of entry for the underlying Plato Australian Shares Income Fund and the Company offers an attractive regular, fully franked monthly income has underpinned demand for PL8.

#### **WLE's Acquisition of QVE Complete**

During the month, WAM Leaders Limited (ASX: WLE) completed the acquisition of QV Equities Limited (ASX: QVE). A total of 103.48 million new WLE shares were issued and \$82.45 million was paid in cash. Post the acquisition, WLE has 1.37 billion shares on issue with a market cap of in excess of \$1.7 billion.

In its July monthly update, which includes the implementation of the acquisition, WLE announced it had 3.4 years of dividend coverage with a Profits Reserve equivalent to 31 cents per share. The Company has already announced it intends to deliver a final dividend for the FY24 period in line with the interim dividend of 4.6 cents per share. This would take the full year dividend to 9.2 cents per share, up from 9.0 cents per share in FY23.

WLE has moved from a premium to a discount in recent months. We attribute this to a combination of short-term relative underperformance and the possibility of some selling pressure on the back of the acquisition.

#### **Conversion of MGF Units to MGOC Units Complete**

In July, the conversion of Magellan Global Fund (ASX: MGF) units to open class units in Magellan Global Fund (Open Class) (ASX: MGOC) was completed. MGF units were converted at a ratio of 0.736 MGOC units with 1.1 billion new MGOC units issued. Following the conversion, MGOC had 3.1 billion units on issue. As was to be expected there was some redemptions post the conversion. As at 31 July 2024, MGOC had 2.8 billion units on issue with net assets of \$8.88 billion, the largest global equity ETMF on the domestic market.

#### **SEC Announces Fully Franked Quarterly Dividend of 3.4 Cents per Share**

On 18 July 2024, Spheria Emerging Companies Limited (ASX: SEC) announced a dividend of 3.4 cents per share, fully franked, for the June quarter. This is a 13.3% increase on the previous quarterly dividend and a 21.4% increase on the June quarter dividend in 2023.

The increased dividend reflects the increased dividend target which was announced in June, with the Company increasing the dividend target from 1.25% of post-tax NTA to 1.5% of post-tax NTA at the end of each quarter. The strong Profits Reserve and franking account allowed for the increase to the dividend target. As at 30 June 2024, the Company's franking account was \$5.6 million (9.3 cents per share). This translates to fully franked dividends of 21.7 cents per share, representing over 1.5 years worth of fully franked dividends if you extrapolate out the June quarter dividend for the FY25 period.

SEC has implemented a number of measures to narrow the discount to NTA, including increased dividends as well as the prospect of converting shares to an open-ended fund if the discount persists. These mechanisms have been effective with the discount to NTA (after tax on realised gains) narrowing to 0.5% as at 30 June 2024.

#### SEC Premium/Discount over 5 Years to 30 June 2024

\*NTA is after tax on realised gains and before tax on unrealised gains.

Source: SEC, Iress, IIR.

## Early FY24 Results

There have been a number of LICs that have already announced their FY24 results. We provide a summary of the results released below.

### Australian Foundation Investment Company (ASX: AFI)

AFI announced its FY24 results on 29 July. The Company reported Revenue of \$334.4 million, down 2.8% on the prior year due to reduced dividends from mining and energy stocks, and a Net Profit of \$296.4 million, down 4.4% on the prior year. The management expense ratio increased marginally to 0.15%

The Company announced an increased final dividend of 14.5 cents per share, fully franked. This takes the full year dividend to 26 cents per share, an increase of 4% on the full year dividend for the FY23 period. The Board sourced 4.5 cents per share of the final dividend from capital gains, which may provide additional tax benefits for certain shareholders.

In its results the Company acknowledged the international portfolio that the Company had been trialling for over 3 years now. The international portfolio has performed well with the capital invested increasing 42.2% since the strategy commenced in May 2021. The Company is considering the most appropriate next steps, including the option to establish a low cost global investment company. We believe a low cost global equity LIC would be a welcomed addition to the domestic LIC market.

The Company continues to trade at an elevated discount to NTA, which has coincided with the earnings yield falling below the Australian 10-year Government Bond Yield. The discount provides the opportunity to gain access to a portfolio of quality stocks at a discount to par value.

### AMCIL Limited (ASX: AMH)

AMH reported its results on 30 July. The Company reported Revenue of \$9.5 million, down 2.5% on the prior year resulting from lower dividends received, and Net Profit of \$7.5 million, down 1.0% on the prior year.

The portfolio performed strongly over the FY24 period, with a total NTA return of 17.5% compared to the S&P/ASX 200 Accumulation Index return of 12.1%. Relative outperformance was driven by the strong performance of a number of positions including Goodman Group, Gentrack, Macquarie Technology Group and CAR Group and was despite the underweight exposure to banks.

The Company announced a final dividend of 2.5 cents per share, fully franked, and a special dividend of 0.5 cents per share, taking the total full year dividend to 4 cents per share, fully franked.

The Company remains cautious given the economic and geopolitical backdrop. While the Company acknowledges the portfolio will not be immune from downside risks, the focus on quality means the Company believes it is well placed to navigate the potentially challenging period ahead.

### Argo Investments Limited (ASX: ARG)

ARG announced its FY24 results on 5 August 2024. Income from Operating Activities was down 5.9% to \$285.5 million, due to a much smaller contribution from the trading portfolio compared to the prior year and reduced dividends from the portfolio, and NPAT was down 6.9% to \$253.0 million.

The total NTA return underperformed the S&P/ASX 200 Accumulation Index. While some holdings, such as Clarity Pharmaceuticals, performed extremely well, this was offset by other Healthcare positions, the performance of companies not held by ARG such as Goodman Group and the underweight exposure to banks which performed strongly over the period.

The Company maintained the final dividend for the FY24 period of 18 cents per share, fully franked, with a full year dividend of 26.5 cents per share. The final dividend includes a LIC capital gain component of 3 cents per share.

### BKI Investment Company Limited (ASX: BKI)

BKI announced its FY24 results on 23 July. The Company reported Revenue of \$68.3 million, down 6% on the prior year and NPAT of \$64.4 million, down 8% on the prior year. Revenue was impacted by the reduced dividends received from mining and energy stocks, as was expected. The MER as at 30 June 2024 was 0.169%, down from 0.184% in the previous corresponding period.

The Company announced a final dividend of 4 cents per share, fully franked, in line with the prior year. The full year dividend for the FY24 period was 7.85 cents per share, up from the ordinary dividend of 7.7 cents per share in the FY23 period.

As at 30 June 2024, the portfolio comprised 40 stocks. During the FY24 period, the Company invested a total of \$126 million with \$96 million worth of sales. In addition to adding to some of the existing holdings, the Company initiated positions in Mirvac Limited (ASX: MGR) and Darlymple Bay Infrastructure (ASX: DBI). During the period, the Company fully exited its position in Rio Tinto (ASX: RIO) primarily due to the reduced dividend, and Treasury Wine Estates (ASX: TWE) with the Company believing that while the removal of the Chinese import tariffs is a positive development the return to previous export volumes is expected to be some way off. The Company had 7.5% of the portfolio in cash as at 30 June 2024, providing the ability to take advantage of opportunities as they arise.

As with many LICs and LITs, the Company is trading at a discount to NTA. As mentioned above, the increased interest rates and bond yields have been a contributor to expanding discounts with the Company also attributing the discount to strong equity markets and the cash position. The Company provides exposure to a portfolio of quality companies with a focus on generating income for investors with the Company providing an above-market yield and the benefit of a fully franked dividend.

### Djerriwarrh Investments Limited (ASX: DJW)

DJW reported its FY24 results on 25 July. Income from operating activities was up 5.4% to \$53.4 million with increased income from options being a large contributor to the increase. The Net Operating Result was \$40.3 million, up from \$39.0 million in the prior year.

A number of call options were exercised throughout the year as a number of portfolio holdings hit all-time highs. Average call option coverage for the year was 34%, with the option positions actively managed throughout the year. While typically only a small part of the option portfolio, the Company also selectively wrote put options throughout the year which contributed positively to option income. The options activity did not have an overly negative impact on the NTA growth with the NTA (after tax on realised gains) up 11.3% compared to the S&P/ASX 200 Accumulation Index of 12.1%.

The Company declared a final dividend of 8 cents per share, fully franked. The full year dividend of 15.25 cents per share was largely in line with the Net Operating Result per share of 15.35 cents per share. The Company continues to build its income profile, delivering an above-market yield.

#### **MFF Capital Investments Limited (ASX: MFF)**

MFF reported its FY24 results on 29 July. MFF's portfolio performed strongly in the FY24 period with Total Net Investment Income up 37.6% on the pcp to \$666.6 million, driven predominantly by the increased value of the portfolio. With expenses up only marginally by comparison, basic EPS was up 39.8% to 77.35 cents per share. This compares to 55.34 cents per share in the prior financial year.

The NTA (after tax on realised gains) return was 29.8% for the FY24 period with the narrowing of the discount over the period resulting in shareholder returns significantly outperforming the NTA.

MFF continued to increase its dividend with the Company declaring a final dividend for the FY24 period of 7 cents per share, fully franked. This is a 16.7% increase on the interim dividend and a 40% increase on the final dividend for FY23. The Company announced it intends to increase the semi-annual dividend to 8 cents per share for the period ending 31 December 2024. As at 30 June 2024, the Company had available franking credits of \$146.8 million, which equates to 25.34 cents per share.

The portfolio is concentrated with the top 5 positions representing over 50% of the portfolio. Alphabet (including both class A and C holdings) was the largest holding as at 30 June 2024 at 14.7% followed by Amazon at 12.8%. While the portfolio holdings performed well in the FY24 period and the Portfolio Manager believes that companies in the portfolio are well positioned, the Company acknowledged that adaptation will be required to continue to generate results over the next decade with the Company expecting that the portfolio would have to be widened to include smaller companies with large addressable markets but less entrenched current positions and possible narrower verticals. The Company has not added any such businesses to the portfolio as yet although has searched for and considered many.

#### **Mirrabooka Investments Limited (ASX: MIR)**

MIR reported its FY24 results on 18 July. The Company reported Revenue of \$12.1 million, up 3.2% on the prior year, and NPAT of \$10.7 million, down 5.1% on the prior year. The decline was largely due to a lower contribution from the trading portfolio.

The portfolio performed strongly over the FY24 period, with a total NTA return of 14.9%, outperforming the benchmark which returned 8.0%. The relative outperformance was driven by a number of holdings including Gentrack, Macquarie Technology Group, Temple & Webster, Netwealth Group and ARB Corporation.

The Company continues to be mindful that valuations remain higher than long-term averages. This saw the Company reduce positions in a number of the larger portfolio holdings to manage the risk of elevated valuations, realising capital gains and facilitating the payment of a special dividend.

The Company announced a final dividend of 6.5 cents per share, fully franked, plus a special dividend of 2.5 cents per share, taking the full year dividend to 13 cents per share. The entire 6.5 cents dividend and the special dividend are sourced from capital gains which may provide additional tax benefits for certain shareholders.

## Active ETFs

### About Active ETFs

Active ETFs are a type of exchange traded product (ETP) traded on the ASX and Cboe Australia. While traditional exchange traded funds (ETFs) adopt passive strategies that synthetically track the performance of an index or other benchmark. Active ETFs are actively managed funds. The legal structure is the same as a traditional managed fund but the units can be bought and sold on the ASX just like shares. Unlike listed investment companies, Active ETFs are open-ended with a market maker. This ensures the units trade close to net asset value. The manager issues new units as required to meet market demand.

## WHO IS IIR?

Independent Investment Research, "IIR", is an independent investment research house based in Australia and the United States. IIR specialises in the analysis of high quality commissioned research for Brokers, Family Offices and Fund Managers. IIR distributes its research in Asia, United States and the Americas. IIR does not participate in any corporate or capital raising activity and therefore it does not have any inherent bias that may result from research that is linked to any corporate/ capital raising activity.

IIR was established in 2004 under Aegis Equities Research Group of companies to provide investment research to a select group of retail and wholesale clients. Since March 2010, IIR (the Aegis Equities business was sold to Morningstar) has operated independently from Aegis by former Aegis senior executives/ shareholders to provide clients with unparalleled research that covers listed and unlisted managed investments, listed companies, structured products, and IPOs.

IIR takes great pride in the quality and independence of our analysis, underpinned by high caliber staff and a transparent, proven and rigorous research methodology.

### INDEPENDENCE OF RESEARCH ANALYSTS

Research analysts are not directly supervised by personnel from other areas of the Firm whose interests or functions may conflict with those of the research analysts. The evaluation and appraisal of research analysts for purposes of career advancement, remuneration and promotion is structured so that non-research personnel do not exert inappropriate influence over analysts.

Supervision and reporting lines: Analysts who publish research reports are supervised by, and report to, Research Management. Research analysts do not report to, and are not supervised by, any sales personnel nor do they have dealings with Sales personnel

Evaluation and remuneration: The remuneration of research analysts is determined on the basis of a number of factors, including quality, accuracy and value of research, productivity, experience, individual reputation, and evaluations by investor clients.

### INDEPENDENCE – ACTIVITIES OF ANALYSTS

IIR restricts research analysts from performing roles that could prejudice, or appear to prejudice, the independence of their research.

Pitches: Research analysts are not permitted to participate in sales pitches for corporate mandates on behalf of a Broker and are not permitted to prepare or review materials for those pitches. Pitch materials by investor clients may not contain the promise of research coverage by IIR.

No promotion of issuers' transactions: Research analysts may not be involved in promotional or marketing activities of an issuer of a relevant investment that would reasonably be construed as representing the issuer. For this reason, analysts are not permitted to attend "road show" presentations by issuers that are corporate clients of the Firm relating to offerings of securities or any other investment banking transaction from that our clients may undertake from time to time. Analysts may, however, observe road shows remotely, without asking questions, by video link or telephone in order to help ensure that they have access to the same information as their investor clients.

Widely-attended conferences: Analysts are permitted to attend and speak at widely-attended conferences at which our firm has been invited to present our views. These widely-attended conferences may include investor presentations by corporate clients of the Firm.

Other permitted activities: Analysts may be consulted by Firm sales personnel on matters such as market and industry trends, conditions and developments and the structuring, pricing and expected market reception of securities offerings or other market operations. Analysts may also carry out preliminary due diligence and vetting of issuers that may be prospective research clients of ours.

### INDUCEMENTS AND INAPPROPRIATE INFLUENCES

IIR prohibits research analysts from soliciting or receiving any inducement in respect of their publication of research and restricts certain communications between research analysts and personnel from other business areas within the Firm including management, which might be perceived to result in inappropriate influence on analysts' views.

Remuneration and other benefits: IIR procedures prohibit analysts from accepting any remuneration or other benefit from an issuer or any other party in respect of the publication of research and from offering or accepting any inducement (including the selective disclosure by an issuer of material information not generally available) for the publication of favourable research. These restrictions do not preclude the acceptance of reasonable hospitality in accordance with the Firm's general policies on entertainment, gifts and corporate hospitality.

### DISCLAIMER

This publication has been prepared by Independent Investment Research (Aust) Pty Limited trading as Independent Investment Research ("IIR") (ABN 11 152 172 079), an corporate authorised representative of Australian Financial Services Licensee (AFSL no. 410381). IIR has been commissioned to prepare this independent research report (the "Report") and will receive fees for its preparation. Each company specified in the Report (the "Participants") has provided IIR with information about its current activities. While the information contained in this publication has been prepared with all reasonable care from sources that IIR believes are reliable, no responsibility or liability is accepted by IIR for any errors, omissions or misstatements however caused. In the event that updated or additional information is issued by the "Participants", subsequent to this publication, IIR is under no obligation to provide further research unless commissioned to do so. Any opinions, forecasts or recommendations reflects the judgment and assumptions of IIR as at the date of publication and may change without notice. IIR and each Participant in the Report, their officers, agents and employees exclude all liability whatsoever, in negligence or otherwise, for any loss or damage relating to this document to the full extent permitted by law. This publication is not and should not be construed as, an offer to sell or the solicitation of an offer to purchase or subscribe for any investment. Any opinion contained in the Report is unsolicited general information only. Neither IIR nor the Participants are aware that any recipient intends to rely on this Report or of the manner in which a recipient intends to use it. In preparing our information, it is not possible to take into consideration the investment objectives, financial situation or particular needs of any individual recipient. Investors should obtain individual financial advice from their investment advisor to determine whether opinions or recommendations (if any) contained in this publication are appropriate to their investment objectives, financial situation or particular needs before acting on such opinions or recommendations. This report is intended for the residents of Australia. It is not intended for any person(s) who is resident of any other country. This document does not constitute an offer of services in jurisdictions where IIR or its affiliates do not have the necessary licenses. IIR and/or the Participant, their officers, employees or its related bodies corporate may, from time to time hold positions in any securities included in this Report and may buy or sell such securities or engage in other transactions involving such securities. IIR and the Participant, their directors and associates declare that from time to time they may hold interests in and/or earn brokerage, fees or other benefits from the securities mentioned in this publication.

IIR, its officers, employees and its related bodies corporate have not and will not receive, whether directly or indirectly, any commission, fee, benefit or advantage, whether pecuniary or otherwise in connection with making any statements and/or recommendation (if any), contained in this Report. IIR discloses that from time to time it or its officers, employees and related bodies corporate may have an interest in the securities, directly or indirectly, which are the subject of these statements and/or recommendations (if any) and may buy or sell securities in the companies mentioned in this publication; may affect transactions which may not be consistent with the statements and/or recommendations (if any) in this publication; may have directorships in the companies mentioned in this publication; and/or may perform paid services for the companies that are the subject of such statements and/or recommendations (if any).

However, under no circumstances has IIR been influenced, either directly or indirectly, in making any statements and/or recommendations (if any) contained in this Report. The information contained in this publication must be read in conjunction with the Legal Notice that can be located at <http://www.independentresearch.com.au/Public/Disclaimer.aspx>.
