WCM Global Long Short Fund Limited (WLS) Proposes Restructure to Unlisted Trust

On 29 April 2022, WLS announced it has executed an implementation deed with Contango Funds Management Limited (CFML) and Associate Global Partners Limited for the WCM Global Long Short Fund (Managed Fund) (the "Fund") in relation to the proposed restructure of WLS.

If implemented, the restructure will result in WLS shareholders exchanging their WLS shares for units in the Fund, a newly created unlisted trust. The Fund will invest in the same underlying portfolio as WLS.

The proposed restructure is the result of a review by an independent board committee to address the persistent discount to NTA.

If the proposed restructure is approved and implemented the following will occur:

- WLS shares will be exchanged for units in the Fund on a onefor-one basis;
- WLS will become wholly owned by the Fund and will be delisted from the ASX;
- The portfolio will be transferred to the Fund;
- The investment management agreement between WLS and CFML will be terminated without any termination fees payable to CFML;
- The Fund will continue to engage WCM Investment Management, LLC to manage the portfolio as Investment Advisor on materially the same terms as WLS; and
- Unitholders in the Fund will be able to request the withdrawal of some or all of their units in the Fund.

WLS shareholders will vote on the Scheme at a general meeting expected to be held in August 2022. Details of the proposed scheme will be provided in a Scheme Booklet which is expected to be distributed to shareholders in June 2022.

WLS has traded at an average discount to pre-tax NTA of 15.2% over the 12-months to 31 March 2022. The proposed resturcture will provide WLS shareholders the ability to exit their investment closer to NAV.

Active ETFs

About Active ETFs

Active ETFs are a type of exchange traded product (ETP) traded on the ASX and Cboe Australia. While traditional exchange traded funds (ETFs) adopt passive strategies that synthetically track the performance of an index or other benchmark. Active ETFs are actively managed funds. The legal structure is the same as a traditional managed fund. but the units can be bought and sold on the ASX just like shares. Unlike listed investment companies, Active ETFs are open-ended with a market maker. This ensures the units trade close to net asset value. The manager issues new units as required to meet market demand.

WHO IS IIR?

Independent Investment Research, "IIR", is an independent investment research house based in Australia and the United States. IIR specialises in the analysis of high quality commissioned research for Brokers, Family Offices and Fund Managers. IIR distributes its research in Asia, United States and the Americas. IIR does not participate in any corporate or capital raising activity and therefore it does not have any inherent bias that may result from research that is linked to any corporate/ capital raising activity.

IIR was established in 2004 under Aegis Equities Research Group of companies to provide investment research to a select group of retail and wholesale clients. Since March 2010, IIR (the Aegis Equities business was sold to Morningstar) has operated independently from Aegis by former Aegis senior executives/shareholders to provide clients with unparalleled research that covers listed and unlisted managed investments, listed companies, structured products, and IPOs.

IIR takes great pride in the quality and independence of our analysis, underpinned by high caliber staff and a transparent, proven and rigorous research methodology.

INDEPENDENCE OF RESEARCH ANALYSTS

Researchanalysts are not directly supervised by personnel from other areas of the Firm whose interests or functions may conflict with those of the research analysts. The evaluation and appraisal of research analysts for purposes of career advancement, remuneration and promotion is structured so that non-research personnel do not exert inappropriate influence over analysts.

Supervision and reporting lines: Analysts who publish research reports are supervised by, and report to, Research Management. Research analysts do not report to, and are not supervised by, any sales personnel nor do they have dealings with Sales personnel

Evaluation and remuneration: The remuneration of research analysts is determined on the basis of a number of factors, including quality, accuracy and value of research, productivity, experience, individual reputation, and evaluations by investor clients.

INDEPENDENCE - ACTIVITIES OF ANALYSTS

IIR restricts research analysts from performing roles that could prejudice, or appear to prejudice, the independence of their research.

Pitches: Research analysts are not permitted to participate in sales pitches for corporate mandates on behalf of a Broker and are not permitted to prepare or review materials for those pitches. Pitch materials by investor clients may not contain the promise of research coverage by IIR.

No promotion of issuers' transactions: Research analysts may not be involved in promotional or marketing activities of an issuer of a relevant investment that would reasonably be construed as representing the issuer. For this reason, analysts are not permitted to attend "road show" presentations by issuers that are corporate clients of the Firm relating to offerings of securities or any other investment banking transaction from that our clients may undertake from time to time. Analysts may, however, observe road shows remotely, without asking questions, by video link or telephone in order to help ensure that they have access to the same information as their investor clients.

Widely-attended conferences: Analysts are permitted to attend and speak at widely-attended conferences at which our firm has been invited to present our views. These widely-attended conferences may include investor presentations by corporate clients of the Firm.

Other permitted activities: Analysts may be consulted by Firm sales personnel on matters such as market and industry trends, conditions and developments and the structuring, pricing and expected market reception of securities offerings or other market operations. Analysts may also carry out preliminary due diligence and vetting of issuers that may be prospective research clients of ours.

INDUCEMENTS AND INAPPROPRIATE INFLUENCES

IIR prohibits research analysts from soliciting or receiving any inducement in respect of their publication of research and restricts certain communications between research analysts and personnel from other business areas within the Firm including management, which might be perceived to result in inappropriate influence on analysts' views.

Remuneration and other benefits: IIR procedures prohibit analysts from accepting any remuneration or other benefit from an issuer or any other party in respect of the publication of research and from offering or accepting any inducement (including the selective disclosure by an issuer of material information not generally available) for the publication of favourable research. These restrictions do not preclude the acceptance of reasonable hospitality in accordance with the Firm's general policies on entertainment, gifts and corporate hospitality.
