### FY22 LIC and LIT Review

On 26 September 2022, IIR published the FY22 LIC and LIT Review. The Review looks at the LIC and LIT share/unit price and pre-tax NTA/NAV performance for the financial year period ending 30 June 2022 (FY22) as well as looking at the dividends/ distributions declared for the period and dividend coverage of the LICs.

The broader Australian and global markets increased during the 1H'FY22, however declined in the 2H'FY22 as the economic landscape changed. Inflationary pressures, war and the increased probability of a recession all contributed to the sell off. Growth and small cap stocks were hit hardest by the market downturn, which is reflected in the performance of a number of LICs and LITs.

From a dividend/distribution perspective, share/unit holders fared well for the FY22 period with 86.6% of LICs/LITs either maintaining or increasing their ordinary dividends/distributions. We note that the trust structure of LITs means that they are required to payout all income and realised capital gains generated in any given year. As such, distributions will be dependent on the performance of the portfolio in any given year which can lead to high levels of distribution volatility. This compares to the company structure of LICs, which allows them to reserve income and capital gains for future dividend payments.

The report can be found on the IIR website (www. independentresearch.com.au).

Under the buy-back, FPC shareholders who elected to participate received units in Fat Prophets Global High Conviction Hedge Fund (ASX: FATP) upon buy-back of the shares. 6.7m shares were acquired under the third buy-back offer at a price of \$0.9861 per share.

The buy-back was implemented in an attempt to address the discount to NTA at which the company had traded by offering shareholders the option to effectively trade their shares for units in the recently created actively managed ETF, FATP, which has substantially the same investment strategy. The buy-back provides shareholders the ability to sell their shares at the relevant NAV per share less a discount of 3%.There is one more buy-back offer scheduled under the scheme.

FPC has continued to trade at a discount to the pre-tax NTA however the rolling 12-month average discount at which the shares have traded has narrowed since the announcement of the scheme.

### **RF1 Adds New Strategy**

Regal Investment Fund (ASX: RF1) announced in September that it was adding the Resources Royalties Strategy to the portfolio, conditional on the completion of a transaction involving a Liquidity Proposal to be put to unitholders in the Gresham Resources Royalties Fund (GRRF). GRRF has approximately 77m units on issue, 20m of which are currently held by investment funds managed by Regal including RF1.

The Liquidity Proposal will be put to existing unitholders of GRRF and will seek to change the name from GRRF to the Regal Resources Royalties Fund, appoint Regal as trustee and investment manager, modify the GRRF constitution and replace the information memorandum, terminate the existing investment management agreement and approve the payment of a performance fee to GRRF, among other matters. Investment funds managed by Regal will be excluded from voting on the Liquidity Proposal.

If the Liquidity Proposal is approved, GRRF unitholders will have the opportunity to transfer some or all of their GRRF units in return for consideration comprising cash from RF1 and/or RF1 units from other members of the Liquidity Proposal consortium, being Ficus Fiduciary and New Highland Pty Limited. GRRF units will be transferred at \$1.75 per unit. If approved, the Liquidity Proposal is expected to be implemented in October 2022.

The Resources Royalties Strategy aims to provide exposure to a portfolio of natural and renewable resource royalty investments that can provide both income and growth while seeking to minimise some of the downside risks usually associated with investing in mining activities, such as costs and exploration expenditure. The Strategy will seek exposure to a mix of natural and renewable resource royalties, commodity streams and royalty-related products, including listed and unlisted securities, such as equities, warrants, debt and similar instruments.

### **GCI Analysis Still Expects No Payment Shock**

During the month Gryphon Capital Income Trust (ASX: GCI) published an updated analysis regarding the impact of increased interest rates on borrowers capacity to continue to service their mortgage payments. GCI previously published the results of the analysis of a 2% increase in mortgage rates. The most recent analysis looked at the capacity of borrowers to service their mortgages in the event mortgage rates increased by 3.5%.

Based on the analysis, GCI concluded that a vast majority of borrowers are well placed to manage further increases in interest rates. For the cohort of borrowers most exposed to large increases to their mortgage payments, a combination of serviceability buffers, elevated savings rates, over-payment history and strong employment provides effective mitigants against financial stress. Additionally, the substantial build up in borrowers' equity will also enable any borrowers experiencing financial pressure to voluntarily self-manage their way out of arrears through property sales.

## **Active ETFs**

### About Active ETFs

Active ETFs are a type of exchange traded product (ETP) traded on the ASX and Cboe Australia. While traditional exchange traded funds (ETFs) adopt passive strategies that synthetically track the performance of an index or other benchmark. Active ETFs are actively managed funds. The legal structure is the same as a traditional managed fund. but the units can be bought and sold on the ASX just like shares. Unlike listed investment companies, Active ETFs are open-ended with a market maker. This ensures the units trade close to net asset value. The manager issues new units as required to meet market demand.

#### WHO IS IIR?

Independent Investment Research, "IIR", is an independent investment research house based in Australia and the United States. IIR specialises in the analysis of high quality commissioned research for Brokers, Family Offices and Fund Managers. IIR distributes its research in Asia, United States and the Americas. IIR does not participate in any corporate or capital raising activity and therefore it does not have any inherent bias that may result from research that is linked to any corporate/ capital raising activity.

IIR was established in 2004 under Aegis Equities Research Group of companies to provide investment research to a select group of retail and wholesale clients. Since March 2010, IIR (the Aegis Equities business was sold to Morningstar) has operated independently from Aegis by former Aegis senior executives/shareholders to provide clients with unparalleled research that covers listed and unlisted managed investments, listed companies, structured products, and IPOs.

IIR takes great pride in the quality and independence of our analysis, underpinned by high caliber staff and a transparent, proven and rigorous research methodology.

#### INDEPENDENCE OF RESEARCH ANALYSTS

Researchanalysts are not directly supervised by personnel from other areas of the Firm whose interests or functions may conflict with those of the research analysts. The evaluation and appraisal of research analysts for purposes of career advancement, remuneration and promotion is structured so that non-research personnel do not exert inappropriate influence over analysts.

Supervision and reporting lines: Analysts who publish research reports are supervised by, and report to, Research Management. Research analysts do not report to, and are not supervised by, any sales personnel nor do they have dealings with Sales personnel

Evaluation and remuneration: The remuneration of research analysts is determined on the basis of a number of factors, including quality, accuracy and value of research, productivity, experience, individual reputation, and evaluations by investor clients.

#### INDEPENDENCE - ACTIVITIES OF ANALYSTS

IIR restricts research analysts from performing roles that could prejudice, or appear to prejudice, the independence of their research.

Pitches: Research analysts are not permitted to participate in sales pitches for corporate mandates on behalf of a Broker and are not permitted to prepare or review materials for those pitches. Pitch materials by investor clients may not contain the promise of research coverage by IIR.

No promotion of issuers' transactions: Research analysts may not be involved in promotional or marketing activities of an issuer of a relevant investment that would reasonably be construed as representing the issuer. For this reason, analysts are not permitted to attend "road show" presentations by issuers that are corporate clients of the Firm relating to offerings of securities or any other investment banking transaction from that our clients may undertake from time to time. Analysts may, however, observe road shows remotely, without asking questions, by video link or telephone in order to help ensure that they have access to the same information as their investor clients.

Widely-attended conferences: Analysts are permitted to attend and speak at widely-attended conferences at which our firm has been invited to present our views. These widely-attended conferences may include investor presentations by corporate clients of the Firm.

Other permitted activities: Analysts may be consulted by Firm sales personnel on matters such as market and industry trends, conditions and developments and the structuring, pricing and expected market reception of securities offerings or other market operations. Analysts may also carry out preliminary due diligence and vetting of issuers that may be prospective research clients of ours.

#### INDUCEMENTS AND INAPPROPRIATE INFLUENCES

IIR prohibits research analysts from soliciting or receiving any inducement in respect of their publication of research and restricts certain communications between research analysts and personnel from other business areas within the Firm including management, which might be perceived to result in inappropriate influence on analysts' views.

Remuneration and other benefits: IIR procedures prohibit analysts from accepting any remuneration or other benefit from an issuer or any other party in respect of the publication of research and from offering or accepting any inducement (including the selective disclosure by an issuer of material information not generally available) for the publication of favourable research.
