

## IIR LMI Research

### WAM Alternative Assets Limited (ASX: WMA)

During the month we completed a review of WAM Alternative Assets Limited (ASX: WMA). WMA provides exposure to a portfolio of alternative assets including private equity, real assets, real estate, infrastructure and private debt strategies. The Company seeks to gain exposure to these asset classes through a range of structures including funds, co-investments, secondary investments and separate mandates. The Company seeks to deliver absolute returns through a combination of dividends and capital growth, while providing diversification benefits to investors.

The portfolio is managed by Wilson Asset Management (International) Pty Ltd ("WAMI" or the "Manager"), which forms part of the Wilson Asset Management Group. WAMI has now been managing the portfolio for over three years after being appointed in September 2020 by shareholders and officially commencing as Manager in October 2020. Since taking over the management of the portfolio, WAMI has employed an amended investment strategy with the Manager seeking to realign the portfolio with the broad macroeconomic trends identified by the Manager and adding additional asset classes to increase the diversification in the portfolio. The transition of the portfolio has taken time as a result of the illiquid nature of the portfolio of investments that was inherited from the previous manager. The Manager has now exited 11 investments, with a significant partial redemption from the Argyle Water Fund, which remains the largest investment in the portfolio. The Manager has reinvested the capital into 11 new investments, including expanding the portfolio into healthcare real estate, infrastructure and private credit. Almost 70% of the committed capital to these investments has been called with the remainder sitting in cash waiting to be called. The remaining inherited investments (which represent approximately 25% of the portfolio) are expected to be fully exited by the end of FY26. The Company pays a management fee of 1.0%p.a. (excluding GST) to the Manager and there is no performance fee. The fund of fund structure means there is a double layer of fees, however we note the Company provides access to institutional style fees.

IIR maintains its Investment Grade rating for WMA. Since taking over the management of the portfolio, WMA has made significant strides in recycling capital into new investments that provide exposure to a diversified portfolio of alternative investments not readily accessible to retail investors. The Portfolio Manager has a significant amount of experience in alternative assets however is still building up a track record with regards to this vehicle with almost all exits to date being investments made from the previous manager. Further to this there is high levels of key man risk surrounding the Portfolio Manager. We expect the Manager to add personnel when they are in a position to grow the company, which will require to discount to be eradicated. With regards to the discount, at this time we do not see a catalyst that will result in the Company re-rating to NTA. As such we would be expecting the Company to be required to provide shareholders the opportunity to liquidate the Company at the 2025 AGM. Given this, we view there to be significant risks for investors at this time. If a vote did occur and shareholders voted in favour of liquidating the Company, the portfolio would go into "run off" with capital being repaid as investments were able to be exited. While liquidity in the portfolio has improved, there has been a number of recent private equity investments which would likely take some time to be realised. We believe this risk is being factored into the trading price of WMA. The removal of the risk surrounding the longevity of the vehicle will be a key inflection point for the Company.

## LMI Market News

### KKC Provides FY25 Distribution Guidance

On 21 June 2024, KKR Credit Income Fund (ASX: KKC) announced the distribution guidance for FY25 of 1.67 cents per unit per month, equivalent to 20 cents per annum. The distribution amount is the same as for the previous financial year period.

The distribution represented an annualised yield of 8.0% based on the NAV as at 31 May 2024 and 8.5% based on the unit price as at 31 May 2024. The target distribution assumes income levels based on current and future cash flow from the portfolio after fees and costs.

Since listing in November 2019, KKC has paid an increasing annual distribution amount.

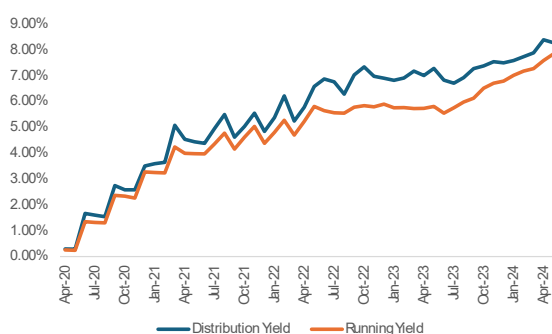

#### KKC Distribution Amount by Financial Year

Source: ASX, IIR

In line with the increasing distribution amount, KKC has delivered an improved yield since the Trust began paying distributions. The trailing 12-month distribution yield has been slightly higher than the running yield due to the discount to NAV at which KKC has been traded.

### QVE Shareholders Vote in Favour of Acquisition by WLE

At the Scheme meeting in June, shareholders voted in favour of the proposed acquisition of QVE shares by WAM Leaders Limited (ASX: WLE). 91.9% of shareholders voted in favour of the proposal. The acquisition remains subject to court approval, which is scheduled for 4 July with QVE shares scheduled to be suspended from trading post approval with the Scheme to be implemented on 15 July. QVE shareholders have the option to receive WLE shares as consideration for their QVE shares, cash or a combination of both. The pre-tax NTA value on 4 July will be used for determining entitlements for QVE shareholders. Cash consideration will be provided at a 2.5% discount to the pre-tax NTA on the Calculation Date while scrip consideration will be calculated based on the pre-tax NTA of QVE and WLE. New WLE shares issued under the Scheme are scheduled to commence trading on 16 July, subject to the pre-tax NTA not being required to be referred to an auditor.

### MGF Unitholders Vote in Favour of Conversion to Open-Ended Units

In an unsurprising outcome, during the month unitholders of Magellan Global Fund (ASX: MGF) voted in favour of the proposal to convert closed-ended units into units in the active ETF (MGOC).

MGF units are scheduled to be suspended from trading on 11 July 2024 with a Conversion Date of 15 July 2024. The number of units in MGOC received by MGF unitholders will be based on the Conversion Ratio which is the NAV of MGF divided by the NAV of MGOC on the Calculation Date.

The vote ends a rather long running saga surrounding MGF, which had traded at an elevated discount for a prolonged period of time and endured significant agitation from both unitholders and option holders. Conversion into the open-ended units now provides unitholders the ability to transact around NAV.

### Pengana Global Private Credit Fund (ASX: PCX) Lists

PCX listed on 21 June 2024. The Trust raised \$156.7 million through the issue of 78.4 million units at a price of \$2.00 per unit. The Trust is the first new LIC to come to market since October 2022.

The Trust will invest in a portfolio of private credit funds with the goal of generating strong risk-adjusted returns with a high degree of capital protection. The Trust has a target cash distribution yield of 7%p.a. (net of fees, costs and taxes) with distributions intended to be paid monthly.

The structure is complex with the Trust providing an avenue for investment in the Master Fund, which is expected to provide exposure to 19 underlying private credit funds and in excess of 2,000 loans/securities. With this many underlying funds, the Trust does risk high levels of fee leakage with fees expected to be charged by the Manager of the Trust and the underlying funds.

The Trust is seeking to mitigate one of the pitfalls of listed closed-ended structures, the potential dislocation between the portfolio value and market price. The Trust is seeking to do this through the provision of a regular off-market buy-back scheme, in which the Responsible Entity will offer to buy-back up to 5% of the issued capital on a quarterly basis. The buy-back price will be equal to the NAV per unit at the buy-back pricing date plus the amount of distributions that unitholders would be entitled to if the units were not cancelled from the buy-back. This is the first time such a mechanism has been used for a closed-ended vehicle. Only time will tell whether or not the buy-back scheme achieves the desired result with some potential pros and cons associated with the scheme.

### SEC Increases Quarterly Dividend Target

On 5 June 2024, Spheria Emerging Companies Limited (ASX: SEC) announced it is increasing the quarterly dividend target to 1.50% of post-tax NTA per share. This is up from the previous 1.25% of post-tax NTA per share. The new target is equivalent to an annual yield of 6.0% of post-tax NTA (8.6% grossed-up)

The increased dividend target will be effective for the June quarterly dividend. The increase in the dividend target comes from a strong level of dividends received from the investments in the portfolio combined with a healthy level of retained profits and franking account.

Under the new dividend policy, based on the post-tax NTA as at 31 May 2024, the Company would pay a quarterly dividend of 3.37 cents per share, which is an increase on the previous quarterly dividend of 3 cents per share.

SEC has provided a growing dividend since the commencement of dividends in 2018. Initially the Company had a target quarterly dividend of 1.0% of post-tax NTA. This was increased to 1.25% of post-tax NTA for the June 2023 quarter before the most recent increase to 1.5% of post-tax NTA.

While pegging the dividend to the post-tax NTA will potentially result in some volatility in the dividend amount it does offer the benefit of potentially tempering the payout ratio in down years to limit the impact on the ability of the Company to deliver capital growth.

The Company has sought to implement a number of initiatives to create demand and narrow the discount to NTA, with the Company proposing to pursue avenues to exchange shares for units in the Spheria Australian Smaller Companies Fund in the event the average discount during the 4Q'CY24 exceeds 5%. Since this announcement, the discount has narrowed

with SEC trading at a discount of 4.1% to pre-tax NTA as at 31 May 2024. This compares to an average discount of 11.2% since listing.

### OPH Estimates Annual Distribution of 6 cents per Unit

On 14 June 2024, Ophir High Conviction Fund (ASX: OPH) announced an estimated distribution for the FY24 period of 6 cents per unit. The final distribution is expected to be calculated and announced in mid July and may vary from the estimated distribution.

In May, the Trust announced changes to the Distribution Reinvestment Plan (DRP), which will be available for the annual distribution. Units issued in the DRP will now represent the lower of the NAV or the market price. Where the units are trading at a discount to NAV, units will be purchased on-market. If the NAV is below the market price new units will be issued. We view the change as a positive for unitholders, particularly given the discount at which OPH units have been trading. Purchasing units on-market to satisfy the DRP in the event units are trading at a discount removes the potential dilutionary impact that would occur if new units were issued at the discounted price.

### QRI Raises More Capital

Qualitas Real Estate Income Fund (ASX: QRI) raised more capital during the month with a Placement to wholesale investors. The Trust raised \$36.9 million through the issue of 23.07 million units through the Placement. This comes after the Trust raised \$18.5 million from the Unitholder Purchase Plan (UPP) in May. All capital raisings to date have been done at a price equivalent to the NAV of \$1.60 per unit, meaning the capital raisings have not been dilutive.

The Trust has continued to raise capital to increase the size of the Trust when trading at or above NAV. The Trust has now grown to a market cap of in excess of \$660 million with 422.8 million units on issue.

### WGB Announces Increased Final Dividend

On 3 June 2024, WAM Global Limited (ASX: WGB) announced a fully franked final dividend of 6 cents per share. This will take the full year dividend for FY24 to 12 cents per share, a 4.3% increase on the pcp.

WGB has been reasonably aggressive with its increases in annual dividend since listing as shown in the below chart, although we note the extent of the increases has tapered off in recent years. The Company is seeking to provide shareholders with an above market yield, which is one of the mechanisms used to create demand and manage the discount. Based on the share price at 31 May 2024, the FY24 dividend of 12 cents per share represented a yield of 5.4% (7.7% grossed-up). This is an attractive yield for a global portfolio.

#### WGB Dividends Declared by Financial Year

Source: ASX, IIR

### RF1 Estimates Semi-Annual Distribution of 15 cents per Unit

On 25 June 2024, Regal Investment Fund (ASX: RF1) announced an estimated distribution for the half-year ended 30 June 2024 of 15 cents per unit. The final distribution amount is expected to be calculated and announced in late July. The distribution is an estimate and may change from the actual distribution.

The DRP will be available for the distribution. The DRP price will consider the relationship between the NAV and the market price of RF1, with new units issued through the DRP at the lower of NAV or the market price.

The estimated distribution would take the distribution for the FY24 period to 22 cents per unit, slightly below the 22.78 cents per unit in the prior year.

**MAAT Calls it a Day**

During the month, Monash Investors Small Companies Trust (Hedge Fund) (ASX: MAAT) unitholders approved the merger of MAAT with the Monash Investors Small Companies Fund (MAIF). Units in MAAT were suspended from trading during the month.

MAAT was originally structured as a LIC before restructuring to an active ETF structure. However, the fund has struggled to grow with the Manager deciding to merge the units with the equivalent unlisted fund. Given the inability to scale the ETMF it appears in the best interests to convert into the unlisted fund structure for MAAT unitholders.

## Active ETFs

### About Active ETFs

Active ETFs are a type of exchange traded product (ETP) traded on the ASX and Cboe Australia. While traditional exchange traded funds (ETFs) adopt passive strategies that synthetically track the performance of an index or other benchmark. Active ETFs are actively managed funds. The legal structure is the same as a traditional managed fund but the units can be bought and sold on the ASX just like shares. Unlike listed investment companies, Active ETFs are open-ended with a market maker. This ensures the units trade close to net asset value. The manager issues new units as required to meet market demand.

## WHO IS IIR?

Independent Investment Research, "IIR", is an independent investment research house based in Australia and the United States. IIR specialises in the analysis of high quality commissioned research for Brokers, Family Offices and Fund Managers. IIR distributes its research in Asia, United States and the Americas. IIR does not participate in any corporate or capital raising activity and therefore it does not have any inherent bias that may result from research that is linked to any corporate/ capital raising activity.

IIR was established in 2004 under Aegis Equities Research Group of companies to provide investment research to a select group of retail and wholesale clients. Since March 2010, IIR (the Aegis Equities business was sold to Morningstar) has operated independently from Aegis by former Aegis senior executives/ shareholders to provide clients with unparalleled research that covers listed and unlisted managed investments, listed companies, structured products, and IPOs.

IIR takes great pride in the quality and independence of our analysis, underpinned by high caliber staff and a transparent, proven and rigorous research methodology.

### INDEPENDENCE OF RESEARCH ANALYSTS

Research analysts are not directly supervised by personnel from other areas of the Firm whose interests or functions may conflict with those of the research analysts. The evaluation and appraisal of research analysts for purposes of career advancement, remuneration and promotion is structured so that non-research personnel do not exert inappropriate influence over analysts.

Supervision and reporting lines: Analysts who publish research reports are supervised by, and report to, Research Management. Research analysts do not report to, and are not supervised by, any sales personnel nor do they have dealings with Sales personnel

Evaluation and remuneration: The remuneration of research analysts is determined on the basis of a number of factors, including quality, accuracy and value of research, productivity, experience, individual reputation, and evaluations by investor clients.

### INDEPENDENCE – ACTIVITIES OF ANALYSTS

IIR restricts research analysts from performing roles that could prejudice, or appear to prejudice, the independence of their research.

Pitches: Research analysts are not permitted to participate in sales pitches for corporate mandates on behalf of a Broker and are not permitted to prepare or review materials for those pitches. Pitch materials by investor clients may not contain the promise of research coverage by IIR.

No promotion of issuers' transactions: Research analysts may not be involved in promotional or marketing activities of an issuer of a relevant investment that would reasonably be construed as representing the issuer. For this reason, analysts are not permitted to attend "road show" presentations by issuers that are corporate clients of the Firm relating to offerings of securities or any other investment banking transaction from that our clients may undertake from time to time. Analysts may, however, observe road shows remotely, without asking questions, by video link or telephone in order to help ensure that they have access to the same information as their investor clients.

Widely-attended conferences: Analysts are permitted to attend and speak at widely-attended conferences at which our firm has been invited to present our views. These widely-attended conferences may include investor presentations by corporate clients of the Firm.

Other permitted activities: Analysts may be consulted by Firm sales personnel on matters such as market and industry trends, conditions and developments and the structuring, pricing and expected market reception of securities offerings or other market operations. Analysts may also carry out preliminary due diligence and vetting of issuers that may be prospective research clients of ours.

### INDUCEMENTS AND INAPPROPRIATE INFLUENCES

IIR prohibits research analysts from soliciting or receiving any inducement in respect of their publication of research and restricts certain communications between research analysts and personnel from other business areas within the Firm including management, which might be perceived to result in inappropriate influence on analysts' views.

Remuneration and other benefits: IIR procedures prohibit analysts from accepting any remuneration or other benefit from an issuer or any other party in respect of the publication of research and from offering or accepting any inducement (including the selective disclosure by an issuer of material information not generally available) for the publication of favourable research. These restrictions do not preclude the acceptance of reasonable hospitality in accordance with the Firm's general policies on entertainment, gifts and corporate hospitality.

### DISCLAIMER

This publication has been prepared by Independent Investment Research (Aust) Pty Limited trading as Independent Investment Research ("IIR") (ABN 11 152 172 079), an corporate authorised representative of Australian Financial Services Licensee (AFSL no. 410381). IIR has been commissioned to prepare this independent research report (the "Report") and will receive fees for its preparation. Each company specified in the Report (the "Participants") has provided IIR with information about its current activities. While the information contained in this publication has been prepared with all reasonable care from sources that IIR believes are reliable, no responsibility or liability is accepted by IIR for any errors, omissions or misstatements however caused. In the event that updated or additional information is issued by the "Participants", subsequent to this publication, IIR is under no obligation to provide further research unless commissioned to do so. Any opinions, forecasts or recommendations reflects the judgment and assumptions of IIR as at the date of publication and may change without notice. IIR and each Participant in the Report, their officers, agents and employees exclude all liability whatsoever, in negligence or otherwise, for any loss or damage relating to this document to the full extent permitted by law. This publication is not and should not be construed as, an offer to sell or the solicitation of an offer to purchase or subscribe for any investment. Any opinion contained in the Report is unsolicited general information only. Neither IIR nor the Participants are aware that any recipient intends to rely on this Report or of the manner in which a recipient intends to use it. In preparing our information, it is not possible to take into consideration the investment objectives, financial situation or particular needs of any individual recipient. Investors should obtain individual financial advice from their investment advisor to determine whether opinions or recommendations (if any) contained in this publication are appropriate to their investment objectives, financial situation or particular needs before acting on such opinions or recommendations. This report is intended for the residents of Australia. It is not intended for any person(s) who is resident of any other country. This document does not constitute an offer of services in jurisdictions where IIR or its affiliates do not have the necessary licenses. IIR and/or the Participant, their officers, employees or its related bodies corporate may, from time to time hold positions in any securities included in this Report and may buy or sell such securities or engage in other transactions involving such securities. IIR and the Participant, their directors and associates declare that from time to time they may hold interests in and/or earn brokerage, fees or other benefits from the securities mentioned in this publication.

IIR, its officers, employees and its related bodies corporate have not and will not receive, whether directly or indirectly, any commission, fee, benefit or advantage, whether pecuniary or otherwise in connection with making any statements and/or recommendation (if any), contained in this Report. IIR discloses that from time to time it or its officers, employees and related bodies corporate may have an interest in the securities, directly or indirectly, which are the subject of these statements and/or recommendations (if any) and may buy or sell securities in the companies mentioned in this publication; may affect transactions which may not be consistent with the statements and/or recommendations (if any) in this publication; may have directorships in the companies mentioned in this publication; and/or may perform paid services for the companies that are the subject of such statements and/or recommendations (if any).

However, under no circumstances has IIR been influenced, either directly or indirectly, in making any statements and/or recommendations (if any) contained in this Report. The information contained in this publication must be read in conjunction with the Legal Notice that can be located at <http://www.independentresearch.com.au/Public/Disclaimer.aspx>.
